ID: 018

Summary: Entering non latin letters in the Name field is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter Name with non latin letters in the Name field
3. Enter valid data in all other fields
4. Click Submit button

Description:
Actual result: Entering non latin letters in the Name field is accepted. Success message appears

Expected result: Entering non latin letters in the Name field is not accepted. Error message appears that the data is invalid

Attachment: A018

Created by Katsiaryna Symanovich

ID: 019

Summary: The Name Field doesn't become red after entering invalid data
Severity: low
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter not valid Name in the Name field
3. Enter valid data in all other fields
4. Click Submit button

Description:
 Actual result: The Name Field doesn't become red after entering invalid data, it's not highlighted

 Expected result: The Name Field becomes empty and red after entering invalid data. Error message appears that the data in the Name field is invalid

Attachment: A019

ID: 020

Summary: Entering only figures in the Name field is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter only figures in the Name field
3. Enter valid data in all other fields
4. Click Submit button

Description:
 Actual result: Entering only figures in the Name field is accepted. Success message appears

 Expected result: Entering only figures in the Name field is not accepted. Error message appears that the data in the Name field is invalid

Attachment: A020

ID: 021

Summary: Entering 129 letters Surname is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter 129 letters in the Surname field
3. Enter valid data in all other fields
4. Click Submit button

Description:
 Actual result: Entering 129 letters Surname in the Surname field is accepted. Success message appears

 Expected result: Max count of letters in the Surname field is 128 letters. Entering 129 letters Surname in the Surname field is not accepted. Error message appears that data is invalid

Attachment: A021

Summary: 33 character Password is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter 33 permitted characters in the Password field
3. Enter valid data in all other fields
4. Click Submit button

Description:
   Actual result: Entering 33 characters Password in the Password field is accepted. Success message appears

   Expected result: Max numbers of characters in the Password is 32 characters. Entering 33 characters Password in the Password field is not accepted. Error message appears that the data is invalid

Attachment: ID: 001

ID: 026

Summary: Entering Password with a space in the middle is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter correct Password with a space in the middle in the Password field
3. Enter valid data in all other field
4. Click Submit button

Description:
 Actual result: Entering Password with a space in the middle in the Password field is accepted. Success message appears

 Expected result: Entering Password with a space in the middle in the Password field is not accepted. Error message appears that the data is invalid

Attachment: ID: 001

Created by Katsiaryna Symanovich

ID: 027

Summary: Entering non latin letters in the Password is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter the permitted Password with one not latin letter in the Password field
3. Enter valid data in all other field
4. Click Submit button

Description:
 Actual result: Entering Password with non latin letters in the Password field is not accepted. Error message appears that the data is invalid

 Expected result: Entering Password with non latin letters in the Password field is accepted. Success message appears

Attachment: A001

ID: 028

Summary: Entering Password without any uppercase letters is accepted
Severity: Major
Priority:
Environment: Ubuntu 20.04.2, Google Chrome 91.0.4472.164 (64-bit)

Steps to reproduce:
1. Open link **http://itcareer.pythonanywhere.com**
2. Enter the permitted Password without uppercase letters in the Password field
3. Enter valid data in all other field
4. Click Submit button

Description:

Actual result: Entering Password without any uppercase letters in the Password field is accepted. Success message appears

Expected result: Entering Password without any uppercase letters in the Password field is not accepted. The Password must contain at least one uppercase letter. Error message appears that the data is invalid

Attachment: A001
