Check List Specific Mobile Testing

ID	Summary	Test cases	Actual result	Comment
Device specific checks				
1	Does the app behave as designed/desired if the device is shaken?			
2	Does the app behave as designed/desired if there is an incoming call?			
3	Does the app behave as designed/desired if there is an incoming SMS?			
4	Does the app behave as designed/desired if there is an incoming vibro cal?			
5	Does the app behave as designed/desired if the device is tilted?			
6	Does the app behave as designed/desired if a local message is coming from another app (think of: calendar reminders, to-do task etc.).			
7	Does the app behave as designed/desired if a push message is coming from another app (think of: twitter mentions, whatsapp message, wordfeud invitation, etc).			
8	Does the app interact with the GPS sensor correctly (switch on/off, retrieve GPS data)?			
9	Is the functionality of all the buttons or keys on the device defined for this app?			
10	Verify that buttons or keys which have no defined function have no unexpected behaviour on the app when activating.			
11	In case there's a true "back" button available on the device does the "back" button take the user to the previous screen?			
12	In case there's a true "home" button available on the device, does the home button get the user back to the home screen of the device?			
13	In case there's a true "menu" button available on the device, does the menu button show the app's menu?			
14	In case there's a true "search" button available on the device, does this get the user to some form of search within the app?			
15	Does the app behave as designed/desired if the device is in airplane mode?			
16	Can the app be found in the app store? (Check after go-live)			
17	Does the app behave as designed/desired if the device is around 40 C?			
18	Does the app behave as designed/desired if GPS works?			
19	Are all touch screen positions (buttons) working when a screen protector is used.			
Network specific Checks				
20	Does the app behave according to specification if connected to the internet through 5G?			
21	Does the app behave according to specification if connected to the internet through 4G?			
22	Does the app behave according to specification if connected to the internet through 3G?			
23	Does the app behave according to specification if connected to the internet through WiFi?			
24	What happens if the app switches between networks (Wi-Fi, 5G, 4G, 3G, 2G)			
25	Does the app behave according to specification if reconnected to the internet (5G, 4G...)			
App specific Checks				

Check List Specific Mobile Testing

ID	Summary	Test cases	Actual result	Comment
26	Is downloading of the app prevented in case it's bigger than the OS allows downloading when connected to cellular networks.			
27	Verify most common gestures used to control the app(swipe up, swipe down, zoom in, zoom out...)			
28	What happens if you select different options at the same time (undesired multitouch, for example – select two contacts from the phone book at the same time).
